Introduction

Located in the equator region and passed by the equator line, Indonesia is one of the leading producer of various agriculture products worldwide. Some of them largely consumed locally, some of them has become prima donna of export commodities.

In PT. Andaru Pangan Sejahtera, we aim to only supply cost-effective high quality agriculture products under the name of Beandaru brand and be presence in the global market. We value reliability and readiness, to support you to save your time and money in delivering the products to your end customer.

We cooperate with various reliable plantations from Indonesia to secure sourcing and deliverable all year round despite seasonal harvest period of agriculture products.

Cacao Beans

Indonesia is **world's 3rd largest cacao beans producer**^{*1}, after Ivory Coast and Ghana. Largely consumed locally makes Indonesia as only **one of the leading cacao beans exporter globally**^{*2}.

There are 3 variety of cultivated cacao beans:

- **Forastero**: most common variety
- Criollo: higher quality, lower yield
- Trinitario: hybrid variety

We source cacao beans (Forastero variety) from Sumatra Island, mainly **Lampung** and **West Sumatra**. Both areas are among 2 of top 10 cacao producing provinces in Indonesia^{*3}.

Coffee Beans

Indonesia is **3rd largest coffee beans producer worldwide**, after Brazil and Vietnam^{*1}. Largely consumed in domestic market, makes Indonesia only as **one of top 10 coffee beans exporter in global market**^{*2}.

There are 3 variety of cultivated coffee beans:

- **Arabica**: Smooth flavour profile
- **Robusta**: Higher caffeine content than Arabica (hence stronger & bitter taste)
- **Robusta**: Unique and distinct taste (a bit of woody)

We source coffee beans (**Arabica and Robusta**) from Sumatra Island (**Lampung and West Sumatra**) as well Java Island (**Central Java and East Java**). All are top coffee producing provinces in Indonesia
